Hotel Information

Overnight Accommodations: Available at three different hotels located at 21st & Shadeland (I-70 East & Shadeland). The Marriott East Hotel (\$109/night), the Fairfield Inn (\$89/night), and La Quinta Inn (\$69/night) share the same parking lot. For reservations, please call the Marriott Conference Center at 317-322-3716, ex. 1101, and ask for either the Marriott East, the Fairfield Inn or the La Quinta. **Please** make your reservations prior to August 26, 2004 to receive special conference rates.

Be sure to indicate you are attending the Indiana 2004 Emergency Response Conference.

Conference Information

Conference Registration

Single rates and group rates (5 for the price-of-4, mailed in the same package) are available to providers. You may register at the Indiana Emergency Response Conference Registration Desk during the following times:

Thursday, Sep. 18, 5 p.m. - 7 p.m.

Friday, Sep. 19, 7 a.m. - 4 p.m.

Saturday, Sep. 20, 7:30 a.m. - 4:30 p.m.

Sunday, Sep. 21, 8 a.m. - 12:30 p.m.

Continuing Education Units/Credits (CEU)

The EMS Commission will issue CEU credit for each approved session of the conference. More information regarding the issuance of credits for conference sessions will be distributed at the conference.

Breaks

Free beverage breaks will be scheduled through out each day. Consult the daily schedule of events for specific times of the breaks.

Badges

Upon registration, all conference attendees will receive a name badge. Badges must be worn at all times to attend sessions and to enter the Exhibit Hall.

Individual Schedule

You may attend any presentation which interests you; however, we ask you to pre-register for all lectures and skill proficiency sessions.

Questions

Please visit the Conference Registration Desk for assistance.

The 2004 Emergency Response Conference is a nonsmoking event. Smoking is permissible in designated areas. The members of Indiana SEMA, EMS Commission and PSTI thank you for making this a nonsmoking conference.

Meetings and Special Events

Meetings

PSTI Board Meeting, Thursday, September 16, 10 a.m., Marriott East Hotel

EMS Commission Meeting, Thursday, September 16, 5 p.m., Marriott East Hotel

Opening Ceremony

Friday, September 17, 12:45 p.m., Marriott East Hotel

Exhibit Hall Hours

Visit the Exhibit Hall to see what's new in equipment and technology.

The Exhibit Hall will be open:

Friday, 11 a.m. - 4:30 p.m. and 6 p.m. - 7 p.m.

Saturday, 9 a.m. - 3 p.m.

Vendor Open House:

Friday evening open house begins at 6 p.m. in the Exhibit Hall.

EMS Banquet

Saturday, September 18, 6 p.m. - 7 p.m., Marriott East Hotel

Tickets must be purchased in advance. \$30 per person.

EMS Awards Ceremony

Saturday, September 18, 7 p.m., Marriott East Hotel, following the EMS Banquet.

You do not need to attend the banquet.

Memorial Service

Sunday, September 19, 8:30 a.m., Marriott East Hotel.

Skill Proficiency Sessions

- Friday, September 17, 2004: 10 a.m. - 5:45 p.m., Bleeding & Shock, Long Bone & Joint Immobilization, Traction Splinting, and Spinal Immobilization Seated & Supine
- Saturday, September 18, 2004: Morning Sessions: 9:30 a.m. - 11:45 a.m., Patient Assessment-Medical / Trauma, Bleeding & Shock, Cardiac Arrest-AED & BVM / Combitube, and Apneic Patient O₂ Admin / Airway, O₂ & Vent / Mouth to Mask
- Saturday, September 18, 2004: Afternoon Sessions: 1p.m. - 4:30 p.m., Cardiac Arrest / AED & BVM / Combitube, Patient Assessment-Medical / Trauma, and Bleeding & Shock, Long Bone & Joint Immobilization, Traction Splinting, and Spinal Immobilization Seated & Supine

Emergency Medical Dispatch (EMD) Special Skills Lab

- Friday, September 17, 2004: 11 a.m. - 4:30 p.m. EMD training / simulation / hands-on program.
- Saturday, September 18, 2004: Morning Sessions: 9 a.m. - 3 p.m., EMD training / simulation / hands-on program

Pre-Conference Special Events

Thursday Sept 16, 2004

8 a.m. to 8 p.m.

Wilderness EMS, Peter A. Dillman, EdD, EMT-P, PI, Outdoor Education Services

This unique and exciting course is the only wilderness first aid training course offered in this area. Successful completion will result in basic wilderness first aid certification. EMT and Paramedic continuing education hours will be given at the conclusion of each session. Limited to the first 20 people. \$65.00 with a 3-day paid conference registration or \$125.00 per person. Parts of this course will be held offsite.

12 p.m. to 4 p.m.

Extrication Techniques That Assist EMS Personnel

Peewee Warren, Plymouth Fire and EMS, Firefighter/EMT

Tammy Neibert, Warren Twp Fire Dept. Firefighter/EMT-P.

The purpose of this course is to show how coordination of extrication teams and other emergency personnel benefits patients. Students will help with the removal of patients that find themselves in difficult unique vehicle scenarios. This is not an extrication class. This is a class on EMS Personnel working together with Special Rescue Teams performing removal and medical assistance of patients from vehicles.

Limited to the first 30 people. Free with a 3-day paid conference registration or \$20.00 per person. Students should bring their own protective gear.

8 a.m. to 11:30 a.m. or 1 p.m. to 4:30 p.m.

Traumatic Brain Injury Course, Kevin Wellman, EMT-P, PI, RN, EMS Coordinator, Lutheran Hospital

Prehospital personnel consider traumatic brain injury (TBI) one of the most serious and difficult challenges that responders encounter in the field, especially when the patient is a child. TBI is a serious health problem in the United States with almost two million injuries occurring each year, the majority of which are caused by traffic crashes, followed by gun shot wounds, falls and sports injuries. It is the leading cause of death and disability in children and young adults. TBI is a potentially treatable injury, and providers of emergency medical services are a critical first link to improved outcome for the patient. Each session will be limited to 30 people. Interested individuals should sign up for the morning or afternoon sessions. Free with a 3-day paid conference registration or \$10.00 per person.

General Session Information

Friday, September 17, 2004

9 a.m. to 11:15 a.m.

Trauma Grand Rounds

Edward A. Bartkus, EMT-P, MD, FACEP

EMS Medical Director, Emergency Medicine & Trauma Center

Clarian Methodist Hospital

This will be a comprehensive presentation of challenging trauma cases. You will be taken from the scene of the injury to release from the trauma center.

1:00 p.m. to 2:00 p.m.

CHF, Why it Develops and How to Treat it.

James Spiller, MD

Medical Director for Southwest Medical Ambulance Service, and Air Evac of Indiana
Emergency Department Director for Daviess Community Hospital.

Congestive Heart Failure is one of EMS personnel's greatest challenges. This session explores the latest prehospital treatment modalities.

2:15 p.m. to 3:15 p.m.

SARS and TB in EMS

Deb McMahon, MD

Ft Wayne-Allen Co. Health Commissioner

This presentation tracks the spread of SARS and how it affected Toronto EMS. Also discussed will be the reemergence of TB in many Indiana communities.

OB/GYN Emergencies

Jackie Richey, EMT-P, PI, RN

Quality Assurance and Training Manager

Rural/ Metro of Indiana

OB/GYN emergencies are often taken for granted, this session will serve as a reminder that they are true emergencies.

Hiring and Employee Relations

Teresa Hall, EMT-P, PI, J.D.

Teresa will present information to help keep managers out of employee relations difficulties

Allen Borck, EMT-P, PI

EMS Coordinator, Greater Lafayette Health Services, Inc.

Developing Techniques to Bring All Students Together

As educators we realize that in EMS education we have a variety of social, economic and educational backgrounds in our student population. How do we, as instructors, strike a balance so the students with a strong educational background are not bored and make sure other students still understand the content?

Friday 2:15 p.m. to 3:15 p.m. Cont'd

Hybrid Cars

Peewee Warren, Firefighter, EMT

Plymouth Fire and EMS

This session will familiarize the student on hybrid vehicles, alternative fuels, and factory loaded vehicle airbags.

3:30 p.m. to 4:30 p.m.

Practical Application of Triage

Colin Smart, BS

Director of TSG Associates

Boundtree Emergency Products

colin@tsgassociates.co.uk

Mr. Smart will share the triage system he developed for use in the United Kingdom.

Poisons: The Unknown Assailants

Don Hess, EMT-P, PI

Coordinator, St Anthony Medical Center EMS Academy

Poisons come in a variety of forms and packages and effect the young as well as the old.

This presentation will explore some of the common toxidromes encountered by healthcare professionals and concentrate on the appropriate management of victims of toxic exposures.

On Line Learning, The Training Director's Best Friend

John Dunavan

Healthstream EMS

This workshop is a chance to get your questions answered - What about cost? What about Quality? What about access? How does it fit with hands-on training? Calculating the true cost of training, recertification, and certification lapses.

Industrial Response: Emergency Response Operations at Eli Lilly and Company, Indianapolis

Joe Amrhein, BS, ChE, EMT-B,

Associate Engineering Consultant

Eli Lilly & Co, Indianapolis

Responding to emergencies in the industrial setting presents unique challenges to responders. This presentation will provide an overview of emergency response activities at Eli Lilly and Company, including medical, HAZMAT, and rescue operations. Scene safety, communications and patient considerations when responding to chemical and pharmaceutical manufacturing facilities will be emphasized throughout the presentation and will help prepare responders for emergency responses at industrial plant sites.

Friday 3:30 p.m. to 4:30 p.m. Cont'd

Tricks of the Trade, Running a Training Institution

Bill J. Hufford, REMTP, PI

Director, Fayette Memorial Hospital EMS

A creative look at how to set up a training institution from scratch. Tricks to getting a class started and more tricks on how to actually run a program of all certification levels.

There is plenty of group participation in this session, designed for the veteran program coordinator or the new PI.

4:45 p.m. to 5:45 p.m.

Creative Carries and Creative Uses of Equipment

Bill J. Hufford, REMTP, PI

Director, Fayette Memorial Hospital EMS

Have fun, laugh a lot, and be prepared for tons of audience participation and interaction in this session. Learn innovative tricks to patient care handling. A great session for all level of providers.

Respiratory Distress in Kids

John Sparzo, MD

Hendricks Regional Health, Danville

This is a great presentation about how to address the severity of breathing difficulties in infants and children. Applicable to EMS as well as in hospital personnel.

Adopting a Customer Service Attitude in EMS

Tim Deckert, NEMTP, PI

Chief Paramedic

Kings Daughters' Hospital & Health Services

This session will present ideas to the EMS provider that, when put into use, will enhance their ability to view those they work for (and with) as customers. The concepts of attitude, anticipation of needs, quality advocacy, and individual accountability will be addressed.

Teaching in a College Environment

Steve Grammer, EMT-P, PI

Program Director, Ivy Tech State College, Fort Wayne

Steve shares his experiences in teaching in the college environment and other things learned over his years in teaching EMS.

Unified Command in the 2002 Marion County Tornadoes

Lt. Jeff Quinn, EMT-P, PI, Firefighter

Perry Township Fire Dept

Unified command has proven to be a very efficient way to run a disaster event as shown during the September 2002 tornado event.

Saturday Sept 18, 2004

8:15a.m. to 9:15 a.m.

The Medicinal History: Clues, Care and Caveats

Peter A. Dillman, EdD, EMT-P, PI

This presentation will prepare you to obtain a more thorough patient history making you smarter about your patient assessments and improving your quality of care.

9:30 a.m. to 10:30 a.m.

Introduction to Wilderness First Aid Education and Training

Peter A. Dillman, EdD, EMT-P, PI

This session will overview the topics covered in a Wilderness First Aid Education and Training Certification Course and other outdoor education courses that Dr. Dillman teaches. Bring your outdoor questions, as this will be a fun and interesting session.

Intermediate EMT as Your Highest Level of Service

Ron Parsons, EMT-I, PI

Wayne Scheutz, EMT-I

Daviess Community Hospital and

Southwest Medical Ambulance Service

Find out how the Intermediate level is working when it is the highest level of service provided.

Organizing Your Billing - Part 1

Maggie Adams

PWW Consulting, Inc

In addition to the basics of billing, Maggie will address the newest changes in the medicare fee schedule. Those changes took effect in July 2004.

National Registry Update

Bill Brown, Executive Director

National Registry of Emergency Medical Technicians

Bill Brown will discuss the latest issues concerning the National Registry and give you a change to ask questions.

Injuries From Less than Lethal Weapons and

Positional Asphyxia as a Result of Restraint

Tom Arkins, EMT-P

CQI Coordinator, Wishard EMS

This lecture will cover patients who have become violent and been subdued by law enforcement prior to our arrival. The discussion will focus towards ways in which patients should not be restrained, causes of death due to restraint, and injuries associated with less than lethal weapons used by law enforcement.

Saturday 10:45 a.m. to 11:45 a.m.

A Trauma Patient Unlike Any Other:

The Crucifixion of Jesus Christ

Scott DeBoer, RN, MSN

Of all the terrible ways to die, most people would say that death by fire or death by drowning are the worst. If you lived 2000 years ago however, you would most certainly disagree.

Throughout world history, one of the most feared deaths was that of crucifixion. This presentation will guide you throughout the medical, psychological, and emotional aspects of crucifixion. The death of the man called Jesus Christ will be used to illustrate the use of a punishment that was unequaled in its cruelty and depth of suffering.

Critical Care Transfer Medications

Tim Abram, EMT-P, PI

EMS Educator, EMT Inc

As critical care transports become an important part of interfacility transports paramedics are introduced to a wider variety of specialty medications. You should be aware of the newer medications and know how to handle them.

Organizing Your Billing, Part II

Maggie Adams

PWW Consulting, Inc. Continuance of part1

EMS Education Agenda for the Future

Bill Brown, Executive Director

National Registry of Emergency Medical Technicians

Where is EMS going in the next 10 years? Join Director Brown in exploring what is planned for the future.

Everything I Needed to Know about EMS I Learned in Kindergarten

Kim Fischer, EMT-P, PI

Heather Coburn, EMT-P, PI

Hendricks Regional Health Care

Don't run with scissors, Take turns being the leader, Say please and thank you, Wash your hands before eating and after going to the bathroom. These kindergarten rules are still in effect especially in EMS.

1:00 p.m. to 2:00 p.m.

Scott DeBoer, RN, MSN

Emergency Care of Crashing Kids

Caring for a critically ill child can sometimes cause anxiety and fear in even the most seasoned of medical professionals. This lecture will review the essential components of a rapid pediatric assessment along with some "just like adults" treatment tips. Through the use of real-life case studies, emergency personnel will come away better able to provide for crashing kids.

Saturday 2:15 p.m. to 3:15 p.m.

Neurological Emergencies

Don Hess, NEMTP, PI

Coordinator St Anthony Medical Center EMS Academy

The brain is a terrible thing to waste Emergencies involving the nervous system pose special challenges to healthcare professionals, but timely and efficient management can mean the difference between survival or death. This presentation will explore the anatomy and physiology of the nervous system and identify priorities and controversies in the management of injuries and illnesses affecting the central and peripheral nervous system.

Acute Coronary Syndromes

Guy H. Haskell, PhD, NREMTP, Director

Emergency Medical and Safety Services Consultants

The acute coronary syndromes station in ACLS presents only a fraction of the information available in the American Heart Association's Guidelines 2000. This presentation fills in the gaps, discussing important new developments in the prehospital care of unstable angina and acute myocardial infarction.

The Real Challenge of Billing

Maggie Adams

PWW Consulting, Inc.

How to handle accounts receivable reports will be addressed along with Indiana's insurance regulations and CMS' latest position on discounting bills to uninsured and underinsured patients.

Brain Based Learning

Jim Floyd, BS, EMT-P, PI

Ivy Tech State College, Indianapolis

Brain based learning is derived from new and exciting research in discovering how the brain naturally learns based on the structure and function of the brain. By understanding and applying the techniques of brain compatible learning and teaching in your EMS courses, you will provide your students with an enriched and optimized environment in which their learning experience will excel.

Driving Update, Part I

Steve Garrison, EMT-P, PI, RN

EMS Coordinator, Memorial Hospital, South Bend

Individuals attending Part I and Part II of this session will be brought up to date on the latest trends in emergency vehicle operations. This will count for driving inservice.

Saturday 3:30 p.m. to 4:30 p.m.

EMD is Coming to Town

Sherry Taylor BS, EMT-B

Communications Manager

Indianapolis Fire Department

Anyone dispatching emergency medical runs will have to be certified. Sherry will bring you up to date on the State's implementation procedure.

Dead, Dead & Dead, Emergency Burn Care What You Really Need to Know

Scott DeBoer, RN, MSN

Burns, whether thermal, electrical, or chemical in origin, change thousands of people's lives forever each year. Emergency and critical care personnel can be one of the first to care for these patients and their assessments and interventions can truly be lifesaving. Assessment and management principles along with their pathophysiologic rationales will be discussed along with disputing many of the myths of emergency and critical care burn care.

Internal Collections, Getting Patients to Pay

Maggie Adams

PWW Consultants, Inc

Especially in today's lower reimbursement climate, if you cannot get paid you will not stay in business.

Instructor Round Table

Various PIs led by Pat Savell, FF, EMT-P, PI

EMS Educator St Anthony's Medical Center, EMS Academy

Join Pat as he leads discussion with primary instructors as they share information that may solve the problems you are having.

Driving Update Part II

Steve Garrison, EMT-P, PI, RN

EMS Coordinator, Memorial Hospital, South Bend

Part II of this session

Sunday, Sept 19

9:30 a.m. to 10:30 a.m.

Bloodletting, Barbers, and Bugs
The Unbelievable History of Medicine
Scott DeBoer, RN, MSN

This fascinating and informative talk looks at the history and evolution of medicine. From the earliest times, parents have looked to medicine, and later nursing & EMS to help their children and some of the most bizarre treatments imaginable have been tried. This unique look at medical history will give attendees a change not only to understand the origins of many currently utilized procedures, but also glimpse at what the future may hold.

10:45 a.m. to 11:45 a.m.

Jump into Triage: A Look at Triage of the Pediatric Patient
Don Hess, EMT-P, PI
Coordinator St Anthony Medical Center EMS Academy

As we all know, dealing with pediatric patients is sometimes very difficult as well as extremely stressful for the EMS practitioner. This presentation will explore triage difference in the pediatric patient as a result of disaster as well as day-to-day EMS responses.

Capnography, What We Don't Know Can Hurt US
Michael Seaver, EMT-P, RN

ABC: airway, breathing and circulation. Three separate concepts, but there is one clinical tool that we can use to evaluate all three and that is capnography. Capnography provides an objective measurement for evaluating the ventilatory status of patients with respiratory disease, distress or complications, as well as patients with compromised airways or circulatory deficits.

Running a Successful PAD Program
Steve Brock, EMT-P
Director of EMS, Brown Township Fire and Rescue
President, Morgan County EMS Association

How do I set up a successful Public Access Defibrillation Program within my community? Learn from experienced EMS, fire and law enforcement personnel who have teamed up to extinguish and arrest sudden cardiac death from your body's most vicious outlaw, ventricular fibrillation. Three perils and pitfalls to avoid. Morgan County AED/PAD Task Force has successfully placed over fifty AEDs within their community within a twelve month period. Presenters include Jim Bruner EMT and Fire Inspector with Mooresville Fire Dept, Dennis Mills of Morgan County Sheriff's Dept and Steve Brock.

Ambulance Competition Review
Judges from the 2004 Governors Cup Ambulance Competition
Learn what was done right and maybe not so right and the 2004 Governor's Cup Ambulance Competition.

Sunday 10:45 a.m. to 11:45 a.m. Cont'd

Meth Labs, Part I

Mike Bigler, Chief Deputy State Fire Marshal.

Many times Meth Labs are disasters waiting to happen. Learn your role when responding to a suspected Meth Lab. This is Part I of III.

1:00 p.m. to 2:00 p.m.

How Long Can You Hold Your Breath, The Near Drowning Experience

Scott DeBoer, RN, MSN

As prehospital care becomes more advanced and critical care medicine evolves, we are now capable of saving the lives of many patients. After the resuscitation is complete, medicine, nursing and families must now look at the neurologic outcomes of those whom we save. As for " what really happens when someone drowns", this will be illustrated as attendees are asked to close their eyes and be guided through the human body's responses to progressive hypoxia and eventual death.

Alive and Arrest, How Far Have We Come and Where are We Going?

Michael K. Matheny, BS, NREMT-P, PI

Community Health Network

This is a follow-up to the "Making Sense of the Arrest and Alive Trial, What Do They Really Mean?" A review of the drugs Amiodarone and Vasopressin will be presented and the significance of the Alive trial will be considered. Then the use of Vasopressin in both V-Fib and Asystole Cardiac Arrests will be discussed. The purpose of the presentation will not be to advocate the use of any one drug, but to review the current research in the management of pre-hospital cardiac arrest and to look at the national trends in standards of care.

EMS Associations, Gaining Support

Steve Brock, EMT-P

EMS Director Brown Township Fire and Rescue

President, Morgan County EMS Association

Have you ever wondered how to obtain your community's support for your EMS program? This program will show you the benefits of EMS associations within your community through getting laypersons involved in your community's EMS program as well as how to offer responders within your area continuous monthly in-services. Presenters include James Bruner, Vice President and Steve Brock, President of Morgan County EMS Association.

Training By the Book, Part I

Sam Steinhilber, EMT-P, PI

Training Coordinator, Public Safety Training Institute

Go through the rules with Sam and see how you are supposed to be functioning. This is Part I of II.

Meth Labs, Part II

Mike Bigler, Chief Deputy State Fire Marshal.

Part II of III

Sunday 2:15 p.m. to 3:13 p.m.

Crime Scene Management

Lt Rick Kiefer

Indiana Law Enforcement Academy

This session will show you how you can do your job and still maintain a crime scene for law enforcement.

Traumatic Brain Injury

Kevin Wellman, EMT-P, PI, RN

Coordinator of Critical Care Transport and EMS

Lutheran Hospital Emergency Department

Prehospital personnel consider traumatic brain injury (TBI) one of the most serious and difficult challenges that responders encounter in the field, especially when the patient is a child. TBI is a serious health problem in the United States with almost two million injuries occurring each year, the majority of which are caused by traffic crashes, followed by gun shot wounds, falls and sports injuries. It is the leading cause of death and disability in children and young adults. TBI is a potentially treatable injury, and providers of emergency medical services are a critical first link to improved outcome for the patient.

Surviving Burnout: "MY EMERGENCY"

Allen Borck, BS, NREMT-P, PI

EMS Coordinator, Greater Lafayette Health Services, Inc.

How do I, as an emergency care provider, deal with burnout. Everyone in the EMS profession deals with "BURNOUT". Either directly or watching coworkers deal with it. Helpful tips to get you through those tough times. Allen brings 24 years of experience to the table and offers an insightful look into this subject to help EMS providers deal with this often overlooked and for some career-ending topic.

Training By the Book, Part II

Sam Steinhilber, EMT-P, PI

Training Coordinator, Public Safety Training Institute

Part II of II

Meth Labs Part III

Mike Bigler, Chief Deputy State Fire Marshal.

Part III of III

3:30 p.m. to 4:30 p.m.

Unbelievable But True Case Studies

Scott DeBoer, RN, MSN

EMS personnel sometimes do not realize the impact that they have on Patients and their families. In this current age of restructuring, floating and downsizing, the patient's outcome can be closed with the chart and our contributions quickly forgotten. Through a review of unbelievable case studies, this lecture will help remind attendees about why they really went into EMS and the differences that we make every day.
